Help Wanted: Show Some Kindness With Operation Round-UP®

Doesn't it make you feel good to help someone in need? Operation Round-UP® is all about showing kindness to others. Most people cannot afford to give hundreds of dollars to help pay for an automated external defibrillator or thousands of dollars for an ambulance. Most cannot purchase an enclosed utility trailer that would help the local Habitat for Humanity Chapter with the work they do. However, if everyone is willing to round up their electric bill to the next dollar, it is possible to make a big difference.

More than a year ago Shelby Electric Cooperative announced its plans to implement Operation Round-UP®. Since participation in the program is voluntary, the response unfortunately has been less than anticipated. Approximately 200 members are currently participating and only about \$1,500 has been raised. More participation is needed and that is why the Cooperative is asking for your help.

Money raised for Operation Round-UP® is not used to pay for electric bills. Instead it is used for charitable purposes that benefit the community. It is the intention of Shelby Electric Cooperative to use Operation Round-UP® money to assist in purchasing worthwhile items that will provide a continuing benefit for many years. Organizations

such as schools, fire departments, police departments, senior citizen centers, libraries, hospitals, the American Red Cross and others all have needs that are sometimes unattainable without assistance from others in the community.

To help encourage more participation in Operation Round-UP®, the cooperative is going to start a monthly drawing. Beginning in January 2007, winners will be randomly selected from a pool of members who are participating in Operation Round-UP®. For a limited time, the cooperative will select someone to receive a gift or prize valued at \$25.

Participation in Operation Round-UP® is easy. On your next electric bill, just check the box in the lower right hand corner of the page, indicating that you want to participate in Operation Round-UP®. Once you do, the cooperative will begin to round up the amount due on your bill to the next dollar. For example, if your bill is \$111.55, the bill would be rounded up to \$112.00, making the contribution 45 cents. Some months the contribution will be more and some months it will be less but it will never be more than \$1.00. Remember, you will be helping others in important ways in addition to helping yourself.

Students Encouraged To Apply for 2007 IEC Memorial Scholarships

Shelby Electric Cooperative President & CEO James E. Coleman is pleased to announce that for the eleventh consecutive year the Illinois electric cooperatives will award academic scholarships to high school seniors through the Illinois Electric Cooperative (IEC) Memorial Scholarship Fund. A total of five scholarships in the amount of \$1,250 each will be awarded in 2007.

High school seniors pursuing a college education anywhere in the United States are eligible to participate in the program. Three of the IEC Memorial Scholarships will be awarded to the son or daughter of an electric cooperative member. A fourth award will go to the son or daughter of an electric cooperative director or employee. A fifth scholarship will be reserved for use at a two-year Illinois community college, and sons and daughters of electric cooperative members, employees and directors are all eligible. Deadline for applications to be returned to the cooperative is Jan. 1, 2007. Candidates are judged on the basis of grade point average, college entrance exam scores, work and volunteer experience, school and civic activities, and a short essay which demonstrates

their knowledge of electric cooperatives. Winners will be notified in May.

"The purpose of the IEC Memorial Scholarship program is to assist electric cooperative youth while honoring past rural electric leaders through memorial gifts," said Coleman.

"Shelby Electric Cooperative and the other Illinois electric cooperatives want to make a difference in their communities. One of the best ways we can do that is by lending a hand to our youth." Shelby Electric Cooperative has had two winners of the IEC Memorial Scholarship in the last 11 years, Katherine M. Brix in 1999 and Blake Durbin in 2004.

The IEC Memorial Scholarship Program was established in 1994 by the Board of Directors of the Association of Illinois Electric Cooperatives. Applications and guidelines can be obtained from high school guidance counselors, the cooperative's Web site: www.shelbyelectric.coop under the "Our Community" tab, or by contacting the cooperative. The telephone numbers for the cooperative are 217-774-3986 and 1-800-677-2612. You may also send an E-mail to scholarship@shelbyelectric.coop.

OFFICE CLOSED

**Your cooperative offices
will be closed on Nov.
10th for Veterans Day,
and on Nov. 23rd & 24th
for Thanksgiving.**

Doug Rye Says:

Why is your house cold?

Doug Rye

How many of you have had this situation? As the wind blows outside and the temperature drops, you get chilled even while you are standing in the middle of your house. How does this happen? The answers are simple. The three biggest problems with the comfort of your house are 1) air infiltration, 2) air infiltration, and, you guessed it, 3) air infiltration.

The total air infiltration in an average house is the equivalent of having a door or window open every day of your life. Now, you've probably heard it said that a house needs to breathe. In all my years in this work, I've never had anyone really explain why a house needs to breathe or even what that statement really means. Another word for house breathing is, simply put, leaks.

Just think with me for a moment. If you can keep the cold air from getting in, it won't take as much to heat your house, not to mention the fact that you would be a lot more comfortable in your home. So where does the air come in? Think of it this way. Anywhere an ant can get in, air can get in.

Here are a few major problem areas:

- Where your wall touches your slab.
- Cracks between the wood framing in your home's walls.
- Around electrical receptacles and light switches in your house, even on interior walls. (When the north wind is blowing, go feel the electrical outlets and switches on your north wall.)

- Holes and leaks around your sink plumbing. To heck with the ants, sometimes a mouse can get through these holes.

- Gas and fireplace flues.

- Recessed can lights that are not IC-rated. Between 3 and 10 cubic feet per minute of air will pass through one of these lights. A typical plastic garbage bag is 3 cubic feet. So that means that three garbage bags full of air can leak out of one of those lights every minute.

- The return air system of your heating/cooling unit. In the average house, gigantic amounts of air enter through this system.

So how are you going to stop the cold air from penetrating your home this winter? The solution is mostly labor and a little bit of material. Now, say this with me. "Caulk it. Caulk it. Caulk it."

For big holes, such as those under the sink, simply use expandable foam. For the smaller cracks, use a clear siliconized caulk. For electrical outlets and light switches, install the insulated foam gaskets and childproof plug inserts. Installing cellulose insulation in your attic will also help reduce air infiltration from your attic space.

These products can be purchased at most home centers.

Doug Rye, the "King of Caulk and Talk" can be heard on radio stations across the country, including Illinois, on his syndicated radio program "Home Remedies". Visit his website www.DougRye.com, email him at info@philliprye.com or call him (888) Doug-Rye if you have questions or want more information.

Looking for something different to do with that Turkey? Try one of these recipes.

Turkey with Pasta

- 1 ½ cups thinly sliced carrots
- 1 cup thinly sliced celery
- 1/3 cup chopped onion
- 2 tablespoons olive oil
- 1 clove garlic, minced
- 2 to 3 cups cubed cooked turkey
- 1 (14.5 oz) can diced tomatoes, undrained
- 1 (15 oz) can tomato sauce
- 1 cup dry white wine or chicken broth
- ¼ cup chopped fresh parsley
- ½ teaspoon basil
- ½ teaspoon salt
- ¼ teaspoon pepper
- 3 cups uncooked ziti or similar pasta, cooked and drained

Directions:

In a large skillet over medium low heat, sauté carrots, celery and onion in the oil until tender, but not browned; add minced garlic and sauté 1 minute longer. Add turkey, tomatoes, tomato sauce, wine or broth, parsley, basil, salt, and pepper. Simmer uncovered for 20 minutes. Toss hot cooked ziti with the hot sauce. Serves 4.

Scalloped Turkey

- 3 to 4 cups cooked turkey
- 1 stick butter
- ½ cup flour
- Salt to taste
- 1/8 teaspoon pepper
- 2 ¼ cups chicken broth
- 1 cup milk
- 2 cups toasted bread cubes
- 2 small onions, chopped
- ½ cup chopped celery
- ½ teaspoon salt
- ½ teaspoon sage
- ¼ cup butter
- 1 (4 oz) can sliced mushrooms

Directions:

Melt ½ cup butter or margarine in saucepan; blend in flour, ½ teaspoon salt and pepper. Cook over low heat until bubbly, stirring. Slowly stir in broth and milk; boil 3 minutes, stirring constantly.

Taste and add salt, if necessary; set aside. In a mixing bowl, lightly toss bread, onion, celery, 1/2 teaspoon salt, sage and 1/4 cup melted butter; arrange in lightly buttered 2-quart casserole baking dish. Top with turkey then cover with sauce and mushrooms. Mix well with fork to moisten the dressing. Bake for about 1 hour at 350 degrees F. Serves 4 to 6.

Turkey and Sweet Potato Chowder

- 1 large potato, peeled if desired and chopped (about 1 ½ cups)
- 1 (14 oz) can reduced-sodium chicken broth
- 2 small ears frozen corn-on-the-cob, thawed, or 1 cup loose-pack frozen whole kernel corn
- 2 ¼ cups cooked turkey breast, cut into ½ inch cubes
- 1 ½ cups milk
- 1 large sweet potato, peeled and cut into ¾ inch cubes (about 1 ½ cups)
- 1/8 to 1/4 teaspoon pepper
- 1/4 cup coarsely chopped parsley

Directions:

In a 3-quart saucepan, combine chopped potato and broth. Bring to boiling; reduce heat. Simmer, uncovered, about 12 minutes or until potato is tender, stirring occasionally. Remove from heat. Do not drain. Using a potato masher, mash potato until mixture is thickened and nearly smooth.

If using corn-on-the-cob, cut the kernels from one of the ears of corn. Carefully cut the second ear of corn crosswise into 1/2-inch-thick slices.

Stir corn, turkey, milk, sweet potato, and pepper into potato mixture in saucepan. Bring to boiling; reduce heat. Cover and cook for 12 to 15 minutes or until the sweet potato is tender.

To serve, ladle chowder into bowls. Sprinkle with parsley. Makes 5 (1 1/3 cup) servings.

Crockpot Turkey and Rice Recipe

- 2 (10 ¾ ounces each) cans cream of mushroom soup
- 2 ½ cups water
- 2 ½ cups uncooked converted white rice
- 1 cup sliced celery
- 2 cups cubed cooked turkey
- 2 cups frozen peas and carrots
- 1 teaspoon poultry seasoning
- 2 tablespoons minced onion

Directions:

Pour soup and water into Crock-Pot and mix. Add remaining ingredients and stir. Cook 5 to 7 hours on low or 2 ½ to 3 ½ hours on high. Check from time to time to make sure rice does not get mushy. Serves 8.

New / Modified Special Rates

Residential Interruptible Rate:

Available to members who allow the cooperative to interrupt all electric service. Limited members receiving service under Schedule A and who do not exceed 200 amp of capacity.

Energy Charge:

- ◆ First 500 kWhs per month at 9.05 cents per kWh
- ◆ Next 500 kWhs per month at 8.03 cents per kWh
- ◆ Over 1,000 kWhs per month at 7.09 cents per kWh

Member must stay on this rate for a period of one year. If stand-by service is requested and is approved by the cooperative, a stand-by provision contract will be required.

Qualified Heat Pump Rate:

Available to any member that has a qualified heat pump (Geothermal/ Ground Source or Air Source) and receives service under Schedules A, A-T or B.

Facility Charge: \$5.00 per month

Energy Charge:

- ◆ Heating and cooling, including electric back-up is billed at 5.7 cents per kWh.
- ◆ Member must agree to install a separate meter and switchover device, which will interrupt the compressor for short periods throughout the year.

For more information, please contact the cooperative.

Electric Heat Rate for Small Residential Members

Available to members under Schedule A and A-T whose load requirements do not exceed 150 kVA of transformer capacity. This rate applies to the months of December, January, and February.

Facilities Charge: \$22.00 per month for service requiring 50 kVA of transformer capacity. Each additional kVA will be provided at a cost of \$1.00 per month per kVA.

Energy Charge:

- ◆ First 500 kWhs per month at 10.7 cents per kWh
- ◆ Next 500 kWhs per month at 9.5 cents per kWh
- ◆ Over 1000 kWhs per month at 5.9 cents per kWh

For more information, please contact the cooperative.
